Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 2, 6 and 8, drawn to a method and apparatus for performing communications by switching over a plurality of communication modes, classified in class 370, subclass 252.
 - II. Claims 3, 4, 7, 9 and 10, drawn to a method and apparatus for temporarily storing storage unit with transfer data restricted to a maximum data size, classified in class 711, subclass 171.
 - III. Claims 5 and 11, drawn to an apparatus for transmitting and receiving data to/from the network, classified in class 709, subclass 312.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions the method of claims 3, 4 and 7 (Group II) involving the temporarily storing storage unit with transfer data restricted to a maximum data size is not related to performing communications by switching over a plurality of communication modes as claimed in the claims of Group I.

Art Unit: 2662

3. Inventions I and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions the apparatus of claim 5 (Group III) involving the receiving data to/ from the network is not related to performing communications by switching over a plurality of communication modes as claimed in the claims of Group I.

4. Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions the apparatus of claim 5 (Group III) involving the receiving data to/ from the network is not related to the temporarily storing storage unit with transfer data restricted to a maximum data size as claimed of Group II.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, the search required for Group I is not required for Group III, and the search required for Group I is not required for Group III, restriction for examination purposes as indicated is proper.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Saba Tsegaye whose telephone number is (703) 308-4754. The examiner can normally be reached on Monday-Friday (7:30-5:00), First Friday off.
